Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "the upper and lower sides" in line 3 and "the left and right sides" in line 5 lack clear antecedent basis rendering the claim indefinite.

Regarding claim 2, "a pin movable hole" in line 10 lacks a clear meaning rendering the claim indefinite. It appears a phrase similar to --an oversized hole-- would be more appropriate.

Regarding claim 3, it has the same deficiency as claim 2.

Regarding claim 4, "a long hole" in line 3 lacks a clear meaning. It appears a phrase similar to --an elongated hole-- would be appropriate.

Regarding claim 7, applicant is attempting to claim the links by setting forth the desired results they provide instead of their structure rendering the claim indefinite and/or incomplete. Note claim 8 obviates this deficiency.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogasawara, et al.

It would have been obvious to duplicate link 12 in figure 3 of the reference and connect parallel to 12 to enhance safety by providing a redundant structure.

Regarding claim 7, all structures are somewhat flexible and link 12 and the duplicated link would be no exception.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogasawara, et al. as applied to claim 1 above, and further in view of Brucher, et al.

It would have been obvious to use "pin movable holes" in the connections between the links and booms in Ogasawara to assure even and smooth movement in view of the teaching in Brucher (elements 23, 24).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Underwood whose telephone number is 571-272-6933. The examiner can normally be reached on Mon-Thursday 7:30-4:30.
